REVISION HISTORY				
REV. #	**CO #**	**DESCRIPTION**	**PREPARED BY**	**DATE**
06.00	DCO00023	Procedure adopted and modified from Israel's QMS for use in Cary's QMS. Initial release to Cary QMS. As part of the modifications the following changes were made: corrected typos in 2.2 and 5.1.3.3. Added 5.1.1-5.1.2.1, and 5.2.3-5.2.3.2. Divided the previous 5.1.1 into the current 5.1.3 and 5.1.3.1 and 5.2.1 into the current 5.2.1 and 5.2.2 and adjusted the wording as necessary for the flow of the procedure. Added sentence about traceability records to 5.2.1. Added 21 CFR Part 830, 21 CFR Part 820.160, and FQMS-7.3.8-001.	Evangelia Evdaimon	23 September, 2020

1. Purpose

This document describes controls for product and component identification, traceability, distribution of finished products, and status labeling to prevent mix-ups and to facilitate investigation into any quality problem identified in a PeriGen product.

2. Scope

2.1. The procedures described in this document apply to PeriGen products and their components from the initial stages of receipt through installation at a customer site.

2.2. This procedure **does not** apply to products that do not meet the definition of a medical device at the target market or product that are defined as medical device but are exempted from quality system.

3. Related Documents

Standards and Regulations:

ISO 13485:2016 – Medical devices-Quality Management Systems-Requirements for regulatory purposes, section 7.5.8, 7.5.9

Health Canada Medical Devices Regulations, sections 21 c) and d) 52 and 54.

FDA Quality System Regulations – 21 CFR Part 820.60, 820.65, and 820.160.

FDA Unique Device Identification – 21 CFR Part 830

Procedures and Forms:

QMS-4.2.3 – Documentation Controls

QMS-7.5.1 – Product Installations and Upgrades, Expansions, and Training

QMS-7.5.8 – Unique Device Identification

FQMS-7.3.8-001 – Design Transfer Form

4. Definitions and Abbreviations

UDI – Unique Device Identifier

5. Procedure

5.1. Identification

5.1.1. All PeriGen products are identified by a unique device identification number (UDI) obtained by FDA accredited issuing agencies per 21 CFR Part 830 (FDA may, in its discretion, act as an issuing agency) as described in **QMS-7.5.8**, *Unique Device Identification*.

5.1.2. For PeriGen's hardware the UDI appears on the packaging/labeling and the hardware itself.

5.1.2.1. PeriGen hardware may additionally be identified by model number or part number which may be appear on the hardware packaging/labeling and the hardware itself.

5.1.3. For PeriGen's software the UDI appears in the Help: About window of the application and in the release notes of the version.

5.1.3.1. PeriGen software is additionally identified by version number and build number. This information appears on the software version stamping, on the CD label, and on the About window of the application.

5.1.3.2. Any CD containing PeriGen software intended only for internal use (a "Complete" CD containing source code, a CD with a pre-release build, a utility CD for Technical Operations personnel, etc.) is so identified on their label. Labels used for CDs are considered forms and are revision controlled as described in QMS-4.2.3, Documentation Controls.

5.1.3.3. The installation package is approved for use upon signature of the ECO for product release. The installation package is copied from the Design Transfer directory to an installation CD for archival purposes, and to a secured and backed up "Official Releases" location for use, and documented using design transfer form FQMS-7.3.8-001. Software product installation is performed by use of the product package from the "Official Releases" repository.

5.2. Traceability

5.2.1. Because PeriGen products are not intended for surgical implant or to support or sustain life, traceability is not a specified requirement for PeriGen products in the applicable regulatory jurisdictions. However, traceability records are maintained such as to easily and timely retrieve information in the event of a recall.

5.2.2. To facilitate tracking in the event of a problem with a software version, PeriGen maintains records of the version installed at each of its customer sites as per **QMS-7.5.1**, *Product Installations and Upgrades, Expansions, and Training* procedure.

5.2.3. To facilitate tracking in the event of a problem with a hardware model, PeriGen maintains records of the version distributed to each of its customer sites as part of its distribution records.

5.2.3.1. PeriGen maintains distribution records which include or refer to the location of:

5.2.3.1.1. The name and address of the initial consignee;

5.2.3.1.2. The identification and quantity of devices shipped;

5.2.3.1.3. The date shipped; and

5.2.3.1.4. Any control number(s) used.

5.2.3.2. Perigen ensures that only those devices approved for release are distributed and that purchase orders are reviewed to ensure that ambiguities and errors are resolved before devices are released for distribution.

6. Responsibilities

The QA Manager is responsible for the activities described in this document.
