UnityPoint Health (UPH) - Vendor Security Review Online Survey - V1126 - Current - 2025

UnityPoint Health is referred to as UPH throughout this survey.

Please note that all vendors are required to complete this survey, for all Cloud/SaaS/Local Applications/Hardware and are referred to as the Vendor Solution 'or' the Solution. UPH may request further details based on your answers.

External documents, such as White Papers, may be externally attached but cannot replace the answers within the survey.

It is a UnityPoint Health policy that we do not sign **NDAs** for security reviews. UPH does not share any data outside of UPH. Also, UPH is not asking vendors to divulge proprietary or confidential information. UPH is asking vendors to confirm that they if the meet NIST, PCI-DSS, and universally recognized security standards.

At the end of the survey, please hit "Submit". Then it is highly recommended to hit the next option to 'save for editing'. The survey can then be edited and resubmitted, as needed.

General Vendor Information

This section addresses general vendor information and a vendor solution overview

1

VSR# - Please provide the 4-digit VSR# that was provided with the email invitation you received. This will be found in the subject line of the email. *

If you do not have this, please reach out to your UPH contact.

4262

2

Vendor Name *

This is your full legal / corporation name.

PeriGen, Inc.

3

Vendor Solution Name *

Please provide the name of the Application, SaaS, Cloud, Equipment, etc.

PeriWatch Surveillance

4

Contact Information *

Please provide your:

1. Full Name
2. Email Address.
3. Phone Number
4. Any other relevant details

1. Bruno Bendavid & Tate Seyler
2. bruno.bendavid@perigen.com & tate.seyler@perigen.com
3. 514-978-0611 & 931-303-4806

5

Please enter vendor contact name that has vetted the accuracy of submitted answers *

Bruno Bendavid & Tate Seyler

6

Please enter the date of survey completion *

11/13/2025

7

What type of Solution is being offered? (Please check all that apply) *

- [x] Local / On-site / On-Premise
- [ ] Cloud / SaaS / Off-site
- [ ] Consulting / Staffing Services
- [x] Data / System Interface(s)
- [ ] Mobile Application
- [ ] Mobile Devices
- [ ] Required State / Government Reporting
- [ ] Web Portal / Website(s)

- [ ] Vendor Supplied Remote Access Tool
- [ ] US Based Consultant and Staffing
- [ ] Non-US Based Consultant and Staffing
- [ ] US and Non-US Based Consultant and Staffing
- [ ] Other

8

Vendor Solution Description / Overview *

Please provide a clear and concise description of what the solution is, what it does, and how UPH will be using it. {Please avoid all sales jargon}

PeriWatch Surveillance is intended to be used as a complete Obstetrical Data Management System, which has the ability to record, store, and display data from fetal and maternal vital signs monitors. It manages patient information from the initial prenatal care to post-delivery discharge. PeriWatch Surveillance organizes

9

Does this security survey apply to ***all*** UPH regions and affiliates, or is it valid only for a specific region, city, or Hospital? *

Choose "All UPH" unless the security, equipment, and/or configuration/setup will be different based on location. If it will be different based on location, then please choose "Other" and list the applicable locations.

- [x] All UPH Regions and Affiliates
- [ ] Other

Credit Card / PCI-DSS and Financial Data Questions

10

Can the Application/SaaS/Service record, screen-capture, create, transfer, or store credit card or any type of financial data? *

If this solution will handle credit card data, please email a PCI-DSS 4.0 AoC (Attestation of Compliance) that is less than 12 months old to "UPH_VENDORSECURITYREVIEW@UNITYPOINT.ORG", please be sure to add the VSR # to the subject line.

- ( ) Financial Data Handling Only
- ( ) Credit Card Data Handling Only
- ( ) Both
- (●) N/A - Solution does not create, transfer, or store any Credit Card or Financial Data

Personally Identifiable Information

11

Can confidential, (PII such as employee, company, or patient (non-ePHI) be recorded, screen-captured, created, transferred and/or stored by the Application/SaaS/Service offered?

This can include but is not limited to: Social security numbers, Email Address, Demographics, Legal Information, Etc.

- ( ) Yes

- [x] No

HIPAA and HITECH

12

Can/Will Protected Health Information (ePHI) be used by the Solution? This includes, but is not limited to: Recording, Screen-capturing, Creating, Transferring, Accessing, and/or Storing?

- [x] Yes
- [ ] No - N/A

13

Does your company meet all HIPAA/HITECH regulations and requirements?

- [x] Yes
- [ ] No

14

Does the Vendor Solution meet all of the following HIPAA Activity Logging Criteria?

HIPAA Log Minimum Criterion - Includes Sections 164.308(a)(5)(ii)(C), 164.312(b), and 164.308(a)(1)(ii)(D).

1. Captures access date and time

2. Captures User Account identifier

3. Captures Record Accessed

4. Captures Privileged commands

6. Captures Read-Only User Access

7. HIPAA Logs are maintained a minimum of 7 years

8. HIPAA Log integrity is maintained, including full user identifiers, even when user accounts are disabled.

9. HIPAA logs can be obtained immediately via the application.

- [x] Yes
- [ ] No - if "No" a detailed explanation is required.

15

Can individual patient stays/services/procedures/etc. be flagged “self-pay” - don’t send to insurance company?

- [ ] Yes
- [ ] No
- [x] N/A - not an EMR/EHR

16

Does the vendor solution provide for the ability to export ePHI in an electronic format per a patient’s request?

- ( ) Yes
- ( ) No
- (●) N/A - not an EMR/EHR

Data/System Interfaces

This section applies to any connection between two systems, even if there are no data transfer or there are no Cloud requirements.

17

Are any Data/System Interfaces requested and does it meet all listed requirements?

Requirements:

1. If FTP is used (single or bi-directional) it must setup by UPH IT Teams and only use SSH for FTP.
2. HL7/DICOM and other ePHI/patient data interfaces must be protected by a PTP VPN, setup with UPH IT Teams.
3. APIs may be allowed to run outside of a PTP VPN if there is sufficient protection - full details will need to be provided and must:
   a. Be end to end encrypted at AES256 / TLS1.2 or higher with no NIST disallowed/depreciated ciphers.

   b. No clear text of any kind.
   c. Destinations of API (domain) must be disclosed.
4. USB, Serial, Parallel, or other direct hardware interfaces must be connected to a system that is protected by UPH controlled Anti-Virus

- (●) Yes - Meets all requirements for all types of interfaces
- ( ) Yes - FTP is used and meets all requirements.
- ( ) Yes - HL7/DICOM meets requirements and a PTP VPN can be setup with UPH.

- ( ) Yes - APIs meet all requirements.
- ( ) Yes - USB, Serial, Parallel, and other direct hardware interfaces meet all requirements.
- ( ) Yes - FHIR - meets requirements and a PTP VPN can be setup with UPH.
- ( ) No - Does not meet all requirements.
- ( ) N/A - No Data/System Interfaces requested or required.

18

Please fully describe the data / system interface details, including:

1. What type(s) of interface are required/requested? (FTP, API, DICOM, HL7, etc.)
2. What it will connect to / from
3. The FQDN(s) domain(s) it will connect to / from
4. What data types if will be transferring, such as PII, financial, credit card, ePHI.
5. List of data points it will transfer, especially if it is an ePHI interface.

1. Only HL7 is used with this solution (options for secure HL7 communication is supported).
2. On-site fetal monitors will communicate with our DAS which is also configured on-site. The DAS will aggregate data to the central server hosting the solution.
3. The hostname will be configured according to the matching name on the TLS certificate provided by UPH.

Non-UPH Network(s), Cloud, Consultant, and/or Vendor Network Security

This section applies to all Non-UPH Network(s), *including Cloud, Vendor, Consultant, SaaS, etc. It does not apply to any UPH controlled Data Center, Network, or facility.*

This includes Data in Motion Security such as, but not limited to: , API, FTP, Data/System Interfaces, HTTPS, Email, APIs, Remote Access, Texting/Messaging, VPN, and all other Data in Motion

methods.

19

Does the Vendor Solution request, require, or offer, request, or require ***any*** non-UPH network or Cloud based components, such as a SaaS, Web Portals, or ***any*** connection to OR from a non-UPH controlled network?

Answer "Yes", unless the vendor solution is only installed/available/connected to UPH controlled networks and physical locations.

- (●) Yes
- ( ) No

20

Does the solution meet ALL the following Data In Motion requirements?

NOTE: This applies to all web sites/URLs/Webportals, etc.

Requirements:

1. TLS1.2 or higher enabled only.
2. Disallowed/deprecated protocols/ciphers are not in use in any way, including: (Examples: MD5, 3DES/TDEA, SSL2.0 - 3.0, TLS1.0 - 1.1, RC4 are disabled)
3. Weak ciphers can be turned off (Examples: CBC, Weak RSA, SHA1)

- (●) Yes
- ( ) No

21

Does the solution meet ALL the following non-UPH network or Cloud Network Security - Security Certificates requirements?

Requirements:

1. SHA1 is *disallowed* and *not* in use for collision resistance OR HTTPS security certificates.
2. All security certificates are signed by a 3rd party CA, current, and do not expire in less than a year.
3. If any customized certificates for hardware or software installs or self-signed certificates are used/required these must be disclosed and justified.

- [x] Yes
- [ ] No

22

Does the solution meet ALL the following non-UPH network or Cloud Network Security - Anti-Malware/Anti-Virus requirements?

Requirements:

All systems are protected by Anti-Virus/Malware with definition updates occurring on-demand/daily, at minimum, and patching and version updates as required by the vendor

- [ ] Yes
- [x] No

23

Please explain why the non-UPH network or Cloud Network Security - Anti-Malware/Anti-Virus requirements cannot be met:

Anti-Malware / Anti-Virus installations are the responsibility of UPH IT. The solution with

24

Does this solutions meet ALL the non-UPH network or Cloud Network Security - Intrusion Detection and Prevention Systems (IDS/IPS): Does the solution meet all the requirements?

Requirements:

IDS/IPS are both in place and updates and patches are critical per Manufacturer recommendation

- ( ) Yes - Both IDS and IPS are in place
- ( ) Yes - Only IDS is in place
- ( ) Yes - Only IPS is in place.
- (•) No - Neither IDS or IPS are in place.

25

Does this solutions meet ALL the non-UPH network or Cloud Network Security - Microsoft Windows Operating Systems requirements?

Requirements:

All Windows OS are fully supported by Microsoft and not End of Life(EOL) OR extended support has been purchased for

- [x] Yes - All Microsoft OS are fully Microsoft Supported and not End of Life.
- [ ] Yes - Some Microsoft OS are fully Microsoft Supported but some are End of Life and extended support has been purchased.
- [ ] No - Some Microsoft OS are END of Life and are not supported.
- [ ] N/A - Vendor doesn't use any Microsoft OS of any kind, anywhere.

26

Are all Linux, Proprietary, or other Non-Microsoft Operating Systems (OS) kept fully patched and are not End of Life (EOL)?

- [ ] Yes - All LInux, Proprietary and Non-Microsoft OS are kept fully patched and none are end of life.
- [ ] Yes - All Proprietary OS are kept fully patches and none are end of life. But, some Linux or other Non-Microsoft OS are not fully patched.
- [x] No
- [ ] N/A - No Proprietary or non-Microsoft Operating Systems in use.

27

Please explain why Linux, Proprietary, or other Non-Microsoft OS are not fully patched and/or are EOL AND how/when the issue will be mitigated.

All servers and workstations are supported on fully patched and current operating systems (UPH IT managed). The data acquisition system (DAS) currently uses a Windows CE OS used only to communicate serial-to-tcp non-PHI monitoring data. PeriGen is in process of developing an upgrade with the latest Linux Ubuntu OS with

28

Does this solutions meet ALL the non-UPH network or Cloud Network Security - Penetration Testing and Vulnerability Remediation requirements?

Requirements:

1. If applicable: Meets HIPAA - 45CFR§164.308(a)(1)(ii)(A) for systems storing ePHI.
2. Complete yearly penetration tests
3. Complete quarterly vulnerability scans
4. Remediate any significant vulnerabilities within 90 days? (Those rated 4.0, or higher, per the standardized CVSS scored method.)
5. For zero-day or critical threats are these mitigated immediately, not to exceed 7 days?

- (●) Yes
- ( ) No

29

Is a PTP-VPN requested or required by UPH or the vendor solution and can it meet all UPH requirements?

Requirements:

Uses NIST and Industry recommended, such as:

1. AES256
2. SHA256

Does not use any NIST or Industry disallowed or deprecated ciphers, which include but not limited to:

1. No MD5
2. No RC4 or older

3. No Sha1
4. No 3DES

- ○ Yes - Meets Requirements
- ○ No - Doesn't Meet All requirements
- ◉ N/A - No PTP VPN requested or required.

Non-UPH Network, Cloud, and/or Vendor Data Center Security

This section applies to all Non-UPH Network(s), *including Cloud, Vendor, Consultant, SaaS, etc. It does not apply to any UPH controlled Data Center, Network, or facility.*

30

Does this solutions Data Centers meet all UPH requirements?

Requirements:

1. Data Centers must be in the US.
2. Data Centers must be surrounded by concrete or similarly strengthened material (Not just drywall)
3. Data Centers must utilize mantraps with multi-factor physical controls including 2 of the following:
   a. Something you are (Biometrics)
   b. Something you know (PIN Number)
   c. Something you have (Key Card)
4. Data Centers must meet Uptime Institute Tier 2 minimum for data center.
5. Data Centers must have routine access logging and auditing (monthly or less)

- ○ Yes

- [x] No

31

Please explain why Vendor Data Centers do not meet UPH requirements.

N/A. The entire solution including data is fully hosted by UPH and within UPH's network on-prem.

Non-UPH Network(s), Cloud and/or Vendor Data Security

This section applies to all Non-UPH Network(s), *including Cloud, Vendor, Consultant, SaaS, etc. It does not apply to any UPH controlled Data Center, Network, or facility.*

32

Does the non-UPH network, Cloud, or Vendor Network(s) store any UPH data or only provide a service?

- [ ] Yes - UPH data can/will be stored.
- [x] No - No static storage, data is transient, and/or Vendor only provides services.

Non-UPH Consultant, Cloud, and/or Vendor Solution Email Security and Requirements

33

Do Vendor owned/managed Email Systems meet these general requirements?

Note: These answers are required to understand vendor email security, regardless of if email is part of the solution or not. If the vendor uses any 'bulk' or external email services these must also meet all UPH Email and Cloud, Data, and Network requirements.

Requirements:

1. **ALL email servers are in the United States**
2. Vendor email systems are protected by SPAM/Malware filters for both incoming *and* outgoing email.
3. Vendor email systems can restrict traffic to TLS1.2, if *requested.*
4. *Vendor does use external email companies to bulk to send to UPH*
5. Vendor email systems do not allow, request, or require spoofing of email addresses or domains.
    a. If your vendor solution allows other companies to spoof or send on behalf of vendor email addresses or domains, the details must be disclosed.

NOTE: If the vendor uses any 'bulk' or external email services these must also meet all UPH Email and Cloud, Data, and Network requirements.

- ○ Yes
- ◉ No

34

Please explain why vendor email security does not meet the general requirements:

N/A. PeriGen utilizes Microsoft Exchange online service. PeriGen does not maintain our own email servers.

35

Does the vendor solution request/require SMTP Relays, and if so, do email relays meet all UPH requirements?

Requirements:

1. SMTP is handled exclusively via Server Class systems in Secure Data Centers and does not require SMTP relay or any Email 'server' class functionality from workstations.
2. Mail Relay does not require storing of UPH email credentials.

- (●) N/A - No Email Relay Requested or Required
- ( ) Yes - Email Relays meet All Requirements
- ( ) No - Email Relay doesn't meet all requirements

36

If the solution requires any special Email handling, such as Email Relays, Spoofing, etc. please provide full details.

Note: UPH has very strict requirements for any type of email exception and does NOT guarantee these will be approved.

If no exceptions are required, please just enter "N/A"

N/A

Non-UPH Networks, Consultant, and/or Cloud Data Lake Security

A Data Lake is created when you take a bulk copy or continuously synchronized copy of ALL data from a resource, such as an entire EMR database, and maintain that in a Cloud resource.

Additional details:
A centralized repository that allows you to store all your structured and unstructured data at any scale. You can store your data as-is, without having to first structure the data, and run different types of analytics—from dashboards and visualizations to big data processing, real-time analytics, and machine learning to guide better decisions.

Unlike a traditional data warehouse, a data lake allows you to store all types of data, including raw copies of source system data, sensor data, social media data, etc., in its natural/raw format. This means you can store all of your data without careful design or the need-to-know what questions you might need answers for in the future.

37

Does the solution require, request, or use any form of "Cloud Data Lake?"

- ○ Yes
- ◉ No

Vendor Web portal / Website / URL

This section applies to all/any URL, website, web portal, etc. that is offered, required, or suggested.

38

Does the solution request, require, or offer any Web Portal, Website, URL, or require downloading of patches, updates, documentation, or software?

- ◉ Yes

No

39

Please provide ALL URL(s) / Domain(s) required, offered, or used and a full explanation and use case for each one.

N/A. Security patches are rolled out by PeriGen support staff via SecureLink and are integrated into UPH's maintenance windows.

40

Do ALL company websites, web portals, URLs, domains, etc., meet the following UPH Requirements?

Requirements:

1. All websites are hosted only in the US by US cased companies.
2. Only TLS1.2 or higher is enabled. (Opportunistic TLS does not meet this requirement)
3. NIST/PCI-DSS/Industry Disallowed/deprecated protocols/ciphers are not in use in any way, including – but not limited to:
   a. MD5
   b. DES - 3DES/TDEA
   c. RC - RC4
4. Industry ciphers deemed weak can be disabled, including:
   a. CBC
   b. SHA1
   c. RSA (Requires ECDHE RSA or stronger)

Yes

No

User Account Security and Requirements

Does your solutions meet the following UPH User Account Security requirements?

Requirements:

1. Meets all current NIST 800-63b Password Guidelines and Best Practices, including:
    a. Check passwords against breached password lists.
    b. Block passwords contained in password dictionaries.
    c. Prevent the use of repetitive or incremental passwords.
    d. Disallow context-specific words as passwords.
2. Meets the following UPH specific requirements, including:
    a. MFA is required to access the solution.
    b. Users securely receive User ID and Password.
    c. Meet UPH min password complexity requirements as follows:
        a. Sixteen total characters, including: one upper case letter, one lower case letter, and one Number.
    d. Accounts can be disabled within 3 days or immediately if escalation to vendor is needed.
    e. *Passwords* expire at 90 days if NIST 800-63b cannot be met.
    f. Password re-use is prevented.
    g. Non-used accounts are disabled at 120 days or less
    h. Prevents multiple repeating characters, (I.E., 1111 or BBB)?
    i. Require a unique User ID and Password / no generic user accessible accounts.
    j. Generic Systems Accounts are acceptable if they meet all other criteria.
    k. Sessions are locked at 15 minutes or less.
    l. User are locked after maximum of 10 attempts.
    m. User Training uses non-real / test data only in a non-production environment.
    n. If requested / offered, AD Integration uses Industry standard Methods, such as SAML2.0

41

If the solution cannot meet ALL / EVERY user account requirement listed, please provide the exact details here. Otherwise, please enter "MEETS ALL REQUIREMENTS"

***** PLEASE DO NOT JUST STATE OR PASTE YOUR USER SECURITY MODEL - ENTER ONLY WHAT IS NOT MET FROM THE LIST ABOVE AND WHY IT ISN'T MET. *****

The solution leverages active directory for authentication on-prem. Therefore, all account security would be managed by UPH. The only exception is a shared account used by PeriGen support staff that meets all other criteria, outside of disabling the account automatically.

Local / On-site / On-Premises Hardware Security

This section is required if ***any*** part of the solution will be installed or physically exist at/on UPH owned networks, systems, or locations.

NOTE: This for *any* hardware at *any* UPH facility or location and is required even if the hardware will not connect to UPH network.

42

Do you sell, lease, gift, or in any other way are you providing hardware to UPH?

This includes non-networked items with any type of network, data transit, and/or storage capabilities.

It also includes anything/everything that connects to any network.

It would also include anything that has an OS, Embedded Chipsets, Bio-Medical devices, Servers, Workstations, mobile devices, IoT, etc.

- (●) Yes
- ( ) No

43

Please provide Hardware Make, Model(s), Version#(s), and Release#(s), (as applicable)

The DAS device is PeriGen proprietary, developed for PeriGen by Sealevel Systems Inc. The solution uses an Intel® Atom E3815, single core processor, ADLINK Q7-BT1-2G-8G-ER Qseven module motherboard and currently runs Windows Embedded Compact 7 OS

44

Please provide detailed Operating System (OS) information for ALL hardware provided, including the version.

Note: Every device that touches a network or can store/transmit data has an OS of some kind. If this is embedded or customized, then please provide the detailed Kernel version(s) it was built on.

FAILURE TO PROVIDE THE FULL OS DETAILS OR FULL KERNEL DETAILS ANY PROPRIETARY OS WAS BUILT ON WILL CAUSE A ROADBLOCK UNTIL IT IS PROVIDED TO UPH

Windows Embedded Compact 7. PeriGen is in process of developing an upgrade with the latest Linux Ubuntu OS with minimal impact to the customer (flash card replacement on existing hardware) planned for Q2 2026.

45

Vendor/non-UPH Entity Provided Hardware Vs. UPH Provided Hardware

UPH Policy is as follows:

1. All hardware will be supplied by UPH, including all laptops, tablets, workstations, servers, phones, etc.,
2. UPH will control the OS, OS Service Packs, Security Updates, Encryption, Anti-Virus, Browser extensions, GPO, and all other aspects of the configuration.
3. Configuration changes MUST be pre-approved and made by UPH Staff.

Can you abide by this policy?

Yes

- ◯ No
- ◯ N/A - No hardware of any kind is part of this solution.

46

Vendor/non-UPH Entity Provided Hardware Vs. UPH Provided Hardware

If you answered "NO", you cannot abide by the "**Vendor/non-UPH Entity Provided Hardware Vs. UPH Provided Hardware Policy",** please explain why.

The only hardware provided by PeriGen is the data acquisition system (DAS).

47

Vendor/non-UPH Entity Provided Hardware Vs. UPH Provided Hardware

Please answer what hardware related items UPH *cannot* manage or control.

Please check all boxes that apply.

- [x] UPH MUST PURCHASE/LEASE/OBTAIN THE HARDWARE FROM THE VENDOR/NON-UPH ENTITY
- [x] UPH CANNOT MANAGE THE OS OPERATING SYSTEM
- [x] UPH CANNOT MANAGE THE OS SERVICE PACKS
- [x] UPH CANNOT MANAGE SECURITY UPDATES
- [x] UPH CANNOT MANAGE ENCRYPTION

- [x] UPH CANNOT MANAGE ANTI-VIRUS/ANTI-MALWARE
- [x] UPH CANNOT MANAGE BROWSER POLICIES AND EXTENSIONS
- [x] UPH CANNOT MANAGE GPO
- [ ] OTHER

48

If you answered "OTHER", or there are other hardware configurations the vendor must manage, please explain this here.

Enter your answer

49

Is any hardware/device(s) FDA or Government Regulated, and does it have special patching/update requirements?

- ( ) No - it is not a regulated/controlled device and there are no special update/patching requirements.
- (•) Yes, this is FDA/regulated/controlled device and there are no special update/patching requirements.
- ( ) Yes, this is FDA/regulated/controlled device and has special update/patching requirements
- ( ) No - it is not a regulated/controlled device, but has special update/patching requirements

50

Please explain networking requirements for this device.

- [x] Wired
- [ ] Wireless
- [ ] Parallel / Serial
- [ ] Parallel / Serial to ethernet conversion required
- [ ] No Network Capabilities
- [ ] Cellular
- [ ] N/A - No Network Capabilities
- [ ] Other

51

Please explain any special network or connectivity requirements.

There is a wall plate the routes data to the DAS. The wall plate converts data from the RS232 format to RS485 and stamps the location with a MAC address. The DAS associates the room to the MAC address stamped by the wall plate such that data forwarded to the server properly associates the data to the patient associated with

52

Please list any additional required hardware/systems UPH must provide to make this hardware function.

EG: UPH must provide a physical or VM Server

Enter your answer

Software and Software Updates

53

Does this solution require vendor provided software to be installed on customer systems and if so, how is the software updated?
If the software requires administrative or elevated rights to do anything but the initial install, that must be checked.

Please check ALL that apply.

- [x] Server Installed Software, Updated Via Web Download.
- [ ] Server Installed Software, Updated by Physical Media (USB, CD, etc.).
- [x] Workstation Installed Software, Updated Via Web Download.
- [ ] Workstation Installed Software, Updated by Physical Media (USB, CD, etc.).
- [ ] N/A - Solution does not require install of any software.
- [ ] Software Requires Administrative Rights to Run

54

Please describe the details of any/all software the solution requires.
If the software requires administrative or elevated rights to do anything but the initial install, that must be fully explained.

If no software, please enter "N/A"

The solution is a software solution comprised of .NET client and server applications on one or more MS Windows Server systems. The solution also requires interfacing with an MS SQL Database to store patient record information. The solution is uploaded to the server via SecureLink. The workstation software is pulled from the

Mobile Specific Applications and Devices

Note: Mobile Devices and Applications must be protected by UPH Owned and Controlled Mobile Device or Application Management MAM or MDM

55

Does this solution require any Mobile Devices?

A mobile device is defined as: Any device that has a custom or mobile operating system and connects to a mobile store, such as Apple iOS or Android based devices.

- ○ Yes
- ◉ No

Vendor Consulting Services

Vendor Consulting Services can be defined as any service that is focused on providing staff or services instead of specific application(s), hardware, or SaaS/tangible service.

As examples: These may include services that augment UPH staff for billing, project management or general consulting services.

56

Does this solution require or offer any consulting services?

- ○ Yes
- ◉ No

Non - United States Locations

(Referred to as non-US 'Footprint' within this survey)

57

Does your organization have any non-US locations, staff, services, and/or 'presence/footprint' of any kind that can create, transfer, store, integrate with, and/or access UPH Data, Networks, and/or Systems/etc., in any way?

This can include, but is not limited to, any non-US location, network, staff, and/or system, etc., that can create, transfer, store, integrate with, and/or access any UPH data, network, system, and/or services.

NOTE: UPH will be testing for and will be sending a Security Scorecard report that discovers any/all non-US IP Addresses, Countries, and locations your organization may be using or operating in. Please be sure to account for *ALL countries in your non-US footprint and explain the impact to UPH.*

- ○ Yes
- ◉ No

Vendor Supplied Remote Access Tools (RAT)

58

UPH Vendor Remote Access Policy. Please answer if you can meet these requirements

1. UPH requires all vendor employees to use UPH provided Remote Access Tools (RAT), unless it is demonstrated/confirmed that UPH tools cannot provide the required functionality. This includes:
   a. Vendors having have unique, individual UPH logins
   b. Use UPH standard VPN
   c. Use remote desktop, SSH, or other UPH provided remote access tools to connect/provide unattended remote support to any systems on the UPH network.
2. <u>If a “shadowed/user interactive” session is needed</u>, UPH will initiate this with an UPH approved tool, and invite the vendor to join the session.

- (●) I agree
- ( ) I disagree
- ( ) N/A - No Remote Access Required

Artificial Intelligence (Ai)

59

Does this solution request, require, or offer Ai use in any way?

- ( ) Yes

No

THANK YOU!

All questions have been answered. Please ensure this is saved. If you have additional questions, feel free to reach out to:
